ControL Your Devices

1 – Preambles

In order to help you to get started with the CLYD solution, this tutorial will explain a series of simple actions allowing you to register a device and deploy a kiosk.

You can then discover CLYD's advanced functions by browsing the online documentation, accessible via the ❓ button at the top right of the web console.
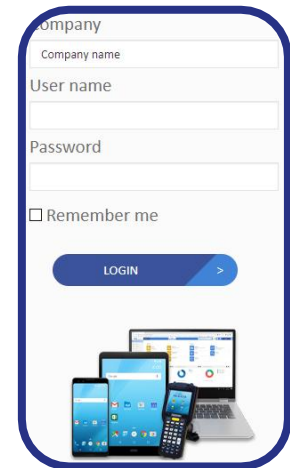

If you have any questions, or if you encounter any difficulties, please feel free to contact the Telelogos support team, who will be happy to provide you with answers and guidance.

- Tel: +33 (0)2 41 22 70 18

- support@telelogos.com

2 – Connecting to the server

○ **Before you start, please make sure you have:**

  ○ The CLYD server's web address or URL.

  ○ The company identifier for the organization that has been created on the CLYD server, which is usually your company's name.

  ○ The username and password for the associated user account.

○ **From your computer: open your web browser.**

  ○ We highly recommend that you use Chrome, since the solution is based on Google technologies and APIs.

○ **Access the CLYD console** by entering the web address you received by e-mail or provided by your administrator.

○ **Complete the fields** according to the connection information
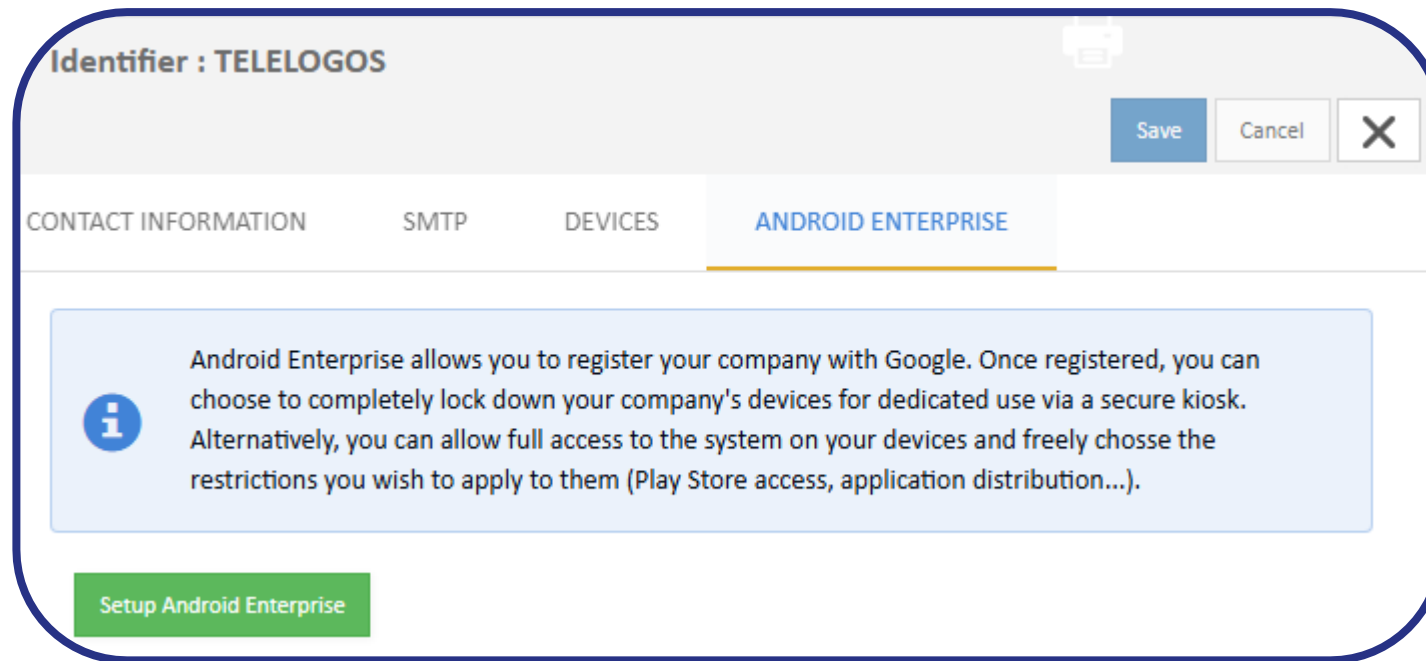

that was provided to you.

3 –Selecting Android Enterprise mode

○ CLYD console: *COMPANY > ANDROID ENTERPRISE*

Note: to ensure the registration process on the Google website is as straightforward as possible, log out of any Google accounts (Gmail / YouTube…) before starting.

○ Follow the registration steps that the Google interface asks you to complete.

4 – Creating the installation package (1)

- CLYD Console: *CONFIGURATION > INSTALLATION PACKAGE >* [+] *SELECT THE MODE*

The installation procedure will differ between devices according to the deployment mode that has been chosen, and will be explained in the next section.

- *The "Android Enterprise QR-Code" mode is recommended for testing purposes.*

# 4 – Creating the installation package (2)

| Name | My_Package | .apk | | Generate package | Cancel | X |

INFORMATION | SYSTEM | CONTACT INFORMATION | PERMISSIONS | MANUFACTURER ADD-ONS | IN-HOUSE APPLICATIONS | FILES

1 **Select the device identifier**
By default the IMEI number is used. The other information is pre-filled.

2 **Select the MANUFACTURER ADD-ON corresponding to the brand/model of the device.**
It allows access to advanced system functions (restart, system commands).

3 **Click on "Generate"** to create and display the installation package.

Telelogos

5 – Deploying the installation package

On a device that is new or has been factory reset:

- Select the required language, then tap 6 times in the white area of the welcome screen.
- Connect the device to a wifi network.
- Scan the QR-code. Depending the device's camera, you may need to apply a zoom to your web browser in order for the code to be read correctly.

Welcome!

Android Enterprise QR-Code   ✕

Send by email

ℹ️ Minimum requirement: Android 7.0

To register a device in Android Enterprise:
- On a new or factory-reset device, the user taps the screen six times in the same spot.
- This triggers the device to prompt the user to scan a QR-Code.
- The user scans the QR-Code that you display in your management console (or similar application) to enroll the device.

Link via QR-Code

EXAMPLE

View 👁️

At any time, the QR-code can be displayed again from the list of installation packages by clicking on the "View" button..

6 – Installing the CLYDMediaContact client

○ **On the device:** During the installation, the application will request a certain number of Android permissions. You will need to activate each one, before tapping the " back " button to resume the installation. Once the client has been installed, you will find your device in the devices menu of the CLYD console.

○ **CLYD console:** *DEVICES*

	Status	EMM ID	Identifier	Name	Brand	Operating system	▼ Last connection
☐	❗	💼	S23CC0811	S23CC0811	Datalogic	Android 11	6/6/2023 5:13:25 PM

○ **Click on the device to view the details**

Identifier : S23CC0811 |K < 1 of 8 > >|

Google ID :
Allows PUSH mode connections

Android Enterprise ID :
The green icon indicates the device is correctly registered in Android Enterprise mode.
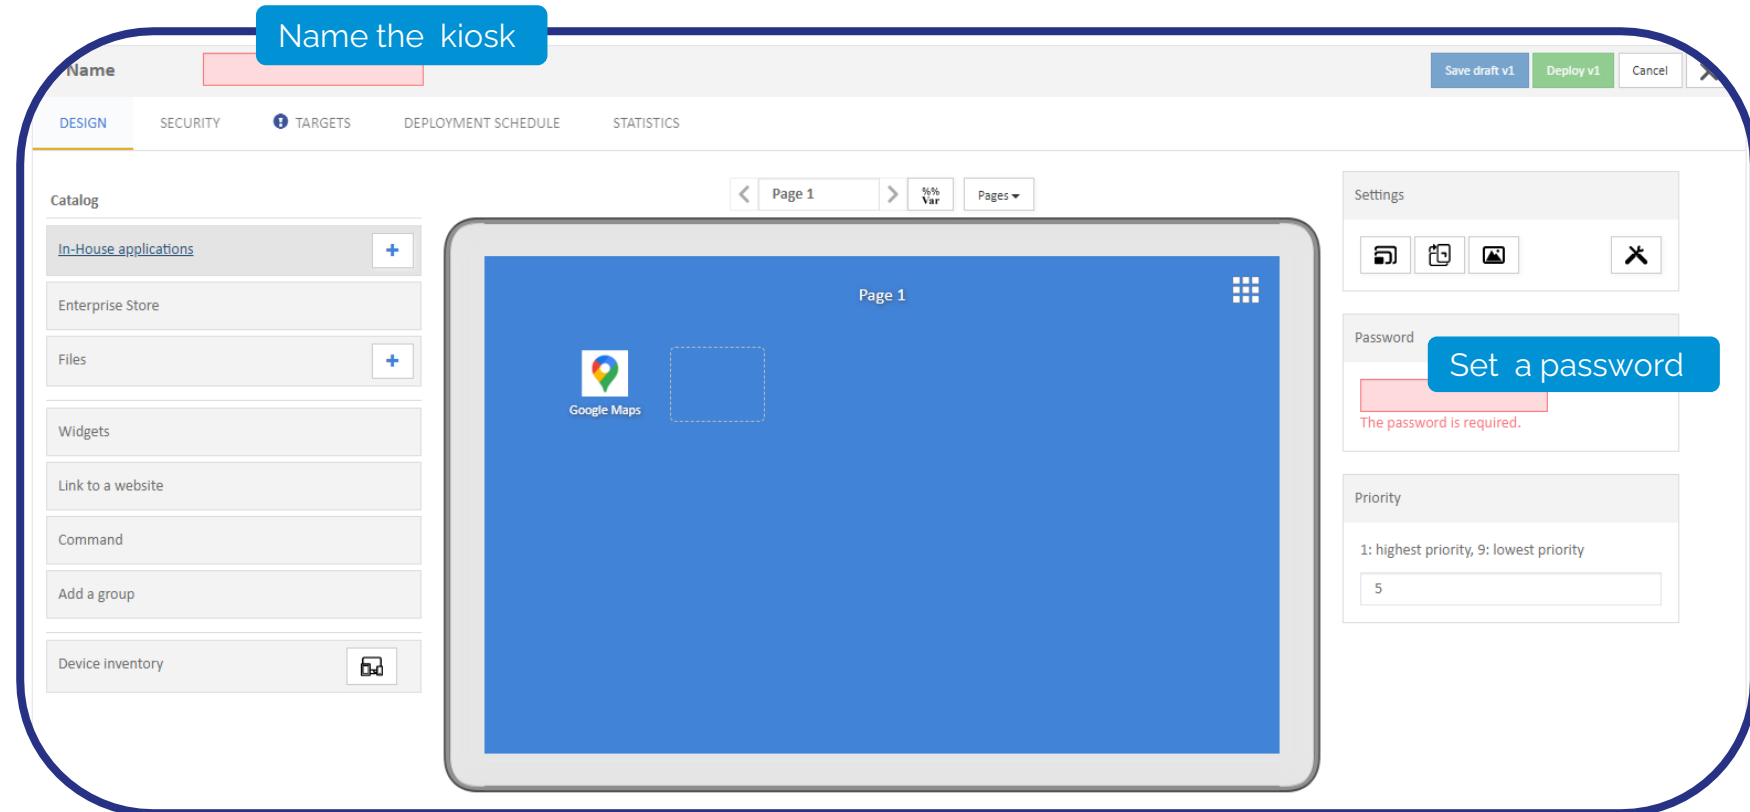

7 – Adding to the catalog

○ **CLYD console:** *CATALOG*

○ Add Play Store or In-House applications (.apk files).

○ Add files (.pdf, etc.).

Google Play Store access via the catalog's 'Entreprise Store ' tab.

8 – Creating a kiosk

- **CLYD console:** *KIOSKS*

- **Click** on "New " [+]

- **Configure** your kiosk (drag and drop catalog items)

Name the kiosk

Set a password

9 – Deploying a kiosk

- **CLYD console:** *KIOSKS > SELECT THE KIOSK TO DEPLOY > " TARGETS " TAB*

- **Click** on: ⊕ Add target

- **Select your company target**. This default target includes all of the devices registered in your organization.

- **Click** on **Deploy v1** button, the kiosk is deployed on the devices after few seconds

- **To exit the kiosk**, tap three times on the device's screen and enter the administrator password, or exit the kiosk from the web console by using the " Kiosks > Stop the kiosk " option available in the device details menu

- **To relaunch the kiosk**, launch the " MediaContact " application and click on the "Home" icon 🏠 or relaunch the kiosk from the web console by using the " Kiosks > Start the kiosk " option available in the device details menu

10 – Leave the device in open mode

○ If you do not need to lock the device with a kiosk, you can leave the device in open mode.

○ **Create** a WorkSp ☐+☐ to deploy your applications

○ **Create** a Security profile and configure the Play Store management policy

○ **Deploy** the WorkSpace

○ **Deploy** the Security profile

A multilingual team, based in France, is at your disposal to assist you in the installation, implementation, configuration and operation of TELELOGOS solutions.
